PROFESSIONAL SUMMARY

Mechanical engineering student with hands-on experience in mechanical design, fabrication, and systems integration through nationally competitive robotics programs. Completed a selective defense and aerospace industry fellowship with exposure to Lockheed Martin and Ball Aerospace. Experienced with SolidWorks CAD, fluid power systems, and DC/AC circuit fundamentals, with demonstrated ability to lead large technical teams and deliver results in fast-paced engineering environments.

EDUCATION

University of Colorado Boulder

Bachelor of Science in Mechanical Engineering.

Expected May 2030

Arapahoe Community College & Metropolitan State University of Denver

Concurrent Enrollment. President's List (2023, 2024, 2025).

2022–2026

Relevant Coursework: Introduction to Aviation & Aerospace Operations, SolidWorks/Mechanical CAD, Fluid Power, Electrical Print Reading, Fundamentals of DC/AC

STEM School Highlands Ranch

High School Diploma. Academic Letter (2023–2024, 2024–2025); High School Leadership

2022–2026

Award (2025). GPA: 4.3.

EXPERIENCE

Summer Fellow

Colorado Space Business Roundtable (CSBR)

- Completed a selective two-week fellowship featuring site visits to Lockheed Martin, Ball Aerospace, and other aerospace organizations, gaining exposure to professional engineering operations and technical development processes.
- Engaged with engineers and industry leaders across aerospace disciplines to develop an understanding of technical collaboration, career pathways, and industry expectations.

PROJECTS

FIRST Robotics Competition - Team Impulse 4418

- Managed internal engineering operations as Project Team Manager (2024–2026), directing 35+ members and contributing to a team-best 13th-place finish among 39 Colorado teams.
- Built a certification system spanning engineering, leadership, and business disciplines adopted into the school curriculum.
- Led collaborative design reviews for the 2025 REEFSCAPE and 2026 REBUILT robots, guiding full-system integration and directly supporting the CAD, prototyping, and testing of drivetrain, indexing, and shooter systems.

BEST Robotics Competition - Team 1920

- Directed engineering operations as General Engineering Manager (2025), leading the team to qualify and compete at nationals.
- Designed the robot archetype and delivered quantitative scoring analysis to drive design decisions as Strategy Lead (2024).

ACTIVITIES & LEADERSHIP

National Technical Honors Society (NTHS) - STEM School Chapter

2024–2026

Co-Founder & Co-President

- Co-founded the chapter and oversaw operations and programming to embed NTHS in the school's engineering curriculum.

CERTIFICATIONS

- Security Clearance Ready Course, Certificate of Completion - Colorado Dept. of Labor and Employment (2026)
- Snap-on Multimeter Certification
- MATLAB Onramp Certificate

AWARDS & HONORS

- FIRST Robotics: Engineering Excellence Award (2024); 6th Overall, Denver Regional (2024); 9th Overall, Denver Regional (2025); Team Spirit Award (2026)
- BEST Robotics: 1st Place Overall, Locals (2022, 2023, 2024, 2025); Most Robust Machine, Regionals (2022); 2nd Place Overall, Regionals (2023); National Qualifier (2025)
- Arapahoe Community College: President's List (2023, 2024, 2025)

SKILLS

Technical: SolidWorks, Fluid Power Systems, DC/AC Circuit Fundamentals, CNC Milling, Electrical Print Reading, Industrial Wiring, Motors & Controls

Leadership: Project Team Management, Strategic Planning, Team Leadership, Mentoring
